

Fundraising guide for participation in The Festival Academy

General information

Most, but not all, participants are funded by a festival. It is in the festival's own interest to delegate a motivated festival operator to attend the Atelier. However, many participants also attend with their own funds or win funding from an organisation, network, public authority, or similar. Many of these funds are regional so it is really worth looking for local programmes or those specific to your discipline/festival speciality. The embassies of participants' home countries in the country hosting the Atelier is also sometimes able to provide financial support. The Festival Academy is happy to prepare a letter of support for selected candidates to help with funding applications.

One participant has also successfully crowd-funded her participation through the website Indiegogo. Another participant has successfully crowdfunded his participation for the Atelier Johannesburg through the Thundafund platform.

Partner organisations

The Festival Academy has formed partnerships with the following organisations to support participants.
